

## CONSOLIDATED FREQUENCY LIST

This list is unofficial and is for reference only.

Not all scanners can receive all the frequencies shown. See your owner's manual for the frequency ranges installed in your scanner.

### VERY IMPORTANT INFORMATION

The FCC has "refarmed" (changed) its system of frequency allocations. Instead of the many business and safety radio services, there are now only two: **Business/Industrial Radio Service** and **Public Safety Radio Service**. Within these, however, some frequency restrictions (e.g., Police, Power, etc) have been carried over. In the *LISTENERS GUIDE BOOK* section, under **8. FEDERAL COMMUNICATIONS COMMISSION**, there is a section on *Frequency Categories* explaining the new system.

The FCC has also almost doubled the number of frequencies by putting a new frequency between each old frequency in most bands.

Licenses are now being granted for frequencies you've never seen before, such as 155.4075, which is between the old frequencies of 155.4000 and 155.4150 (or .0075 above 155.4000). Some scanners may not allow you to tune exactly to the new narrowband frequency and you will have to compromise, in the above example, at 155.4050. You should have good results with this method although you may, some times, also hear stations on either side of the tuned channel (in this case 155.4000 and 155.4150).

Not shown are all the new frequencies in the Business/Industrial Radio Service (IB) between the old frequencies. New frequencies in the 450-512 MHz. Band have five (5) digits after the decimal (e.g. 454.46875). We do not include the last digit. If the fourth digit after the decimal is a "2" or a "7", add a "5" (e.g., 454.4687 would be 454.46875).

Band	Old Spacing	New Spacing
138-150 MHz	0.025MHz	0.0125MHz
150-162 MHz	0.015MHz	0.0075MHz
162-174 MHz	0.025MHz	0.0125MHz
406-420 MHz	0.025MHz	0.0125MHz
450-512 MHz	0.0125MHz	0.00625MHz
851-866 MHz	0.025MHz	0.0125MHz
866-869 MHz	0.0125MHz	0.0125MHz
935-940 MHz	0.0125MHz	0.0125MHz

Land-mobile frequencies above 450 MHz are (with a few exceptions) "paired," that is, a radio channel consists of two frequencies. See **8. RADIO SYSTEMS** for an explanation of pairing. A "\*" indicates that the frequency is not paired. To avoid confusion, this list contains only the **base frequency** of each pair. Here's how to find the mobile frequency:

- 450-470 MHz. The mobile frequency is exactly 5.000 MHz. higher than the base frequency (e.g., 451.3000 base/456.0000 mobile).
- 470-512 MHz. The mobile frequency is exactly 3.000 MHz. higher than the base frequency (e.g., 471.3375 base/474.3375 mobile).
- 806-894 MHz. The mobile frequency is exactly 45.000 MHz. lower than the base frequency (e.g., 851.1125 base/806.1125 mobile).
- 935-941 MHz. The mobile frequency is exactly 39.000 MHz lower than the base frequency (e.g., 935.1125 base/896.1125 mobile).

"<x>" indicates an official or unofficial channel designation or channel number.

Remote Broadcast Pickup (BA) frequencies in the 450-470 MHz band may or may not be paired and may be reversed.

"Itinerant" frequencies are intended for use by licensees that relocate from time to time (e.g., construction companies or circuses).

### FEDERAL GOVERNMENT FREQUENCIES

Federal records have not been available for a number of years. Therefore, our list should be considered unofficial and incomplete. All VHF-low band listings are suspect.

Federal frequencies may be assigned on a local, regional or national basis.

#### SERVICE CODES

BA	Remote Broadcast Pickup (radio-TV)
CB	Citizens Band (Class D)
CC	Citizens Band (Class C)
CAP	Civil Air Patrol
FNI	Federal/Non-Federal Interoperability—Incident Response
FNL	Federal/Non-Federal Interoperability—Law Enforcement
FR	Family Radio
GM	General Mobile Radio
IB	Business
IBA	Business, limited power (B 20 W/M 6 W/Port 2 W)
IBC	Business, limited power itinerant (6 W/6 W/ 2W)
IBD	Business, central station alarm (2 W)
IP	Petroleum Production
IS	Special Industrial (roads, farms, etc.)
IW	Power & Water Utilities
IY	Relay Press (Newspapers)
LA	Automotive Emergency (tow trucks)
LR	Railroad
MC	Maritime Limited coast (private stations)
MG	Maritime Government (Coast Guard)
MP	Maritime Public Coast (marine telephone)
MS	Maritime Shipboard
MU	Multi-Use (MURS)—2watt/no license
NIFC	National Interagency Fire Cache (Boise, ID)
PF	Fire
PH	Highway Maintenance
PL	Local Government
PLP	Public Safety low power
PM	Emergency Medical Service
PO	Forestry Conservation
PP	Police
PS	Special Emergency
PX	All Public Safety
RA	Mobile Telephone (aircraft)
RC	Mobile Telephone (Radio Common Carrier)
RT	Mobile Telephone (landline companies)
